

Lab Rats or Sick Kids?

People for the Ethical Treatment of Animals repeatedly attacks doctors and scientists working to find cures for disease. PETA is engaged in a campaign to cripple the organizations below because they use animals in their important research. And PETA has actually given tens of thousands of dollars to violent criminals convicted of destroying medical research and firebombing laboratories in the name of "animal liberation."

vs.

PETA doesn't deserve your help. These charities do:

Pediatric AIDS Foundation
March of Dimes Birth Defects Foundation
Muscular Dystrophy Association
Shriners Hospitals for Crippled Children
Foundation Fighting Blindness
American Cancer Society
Cancer Research Foundation of America

St. Jude Children's Research Hospital
Boys Town National Research Hospital
Juvenile Diabetes Foundation International
American Heart Association
American Lung Association
Cystic Fibrosis Foundation
National Multiple Sclerosis Society

Don't let extremists like PETA stop the search for cures.

PETA: As ethical as you thought?
